Experience

Research Assistant — Cleveland State University, Cleveland, OH Jan 2022 – May 2026

- Administer and support 15+ Linux servers, Windows servers, virtual machines, and lab network infrastructure, maintaining 99.9% uptime through proactive maintenance and troubleshooting.
- Provide lab-wide systems support for researchers by troubleshooting Linux/Windows access, connectivity, performance, storage, VM workloads, and GPU cluster issues to maintain reliable research computing operations.
- Supported 10+ NSF-funded AI/ML-based cybersecurity projects by testing networked systems, evaluating attack scenarios, identifying vulnerabilities, and validating security controls.

System Engineer — Grameen CyberNet Ltd., Dhaka, Bangladesh Oct 2015 – Feb 2021

- Supported NOC and data center operations by installing, configuring, and maintaining Dell, IBM, and Supermicro servers for reliable infrastructure availability.
- Deployed and managed VMware ESXi/vSphere environments supporting 70+ virtual machines across multi-tenant infrastructure.
- Administered Microsoft Azure, Active Directory, hybrid identity, virtual machines, networking, storage, monitoring, patching, PowerShell automation, backup support, and runbook documentation.

Support Engineer — Grameen CyberNet Ltd., Dhaka, Bangladesh Dec 2014 – Sep 2015

- Provided 24/7 technical support for 1000+ corporate customers, troubleshooting Linux, Windows, macOS, LAN/WAN, wireless, VoIP, and customer network issues to maintain SLA-driven operations.
- Configured and supported Cisco, Mikrotik, Fortinet FortiGate, Cisco Meraki, and Cisco ASA environments, including router/switch setup, firewall rule validation, connectivity troubleshooting, Nagios monitoring, and Syslog review.

Education

Cleveland State University, Cleveland, OH

Ph.D. in Computer Engineering, 2026 | CGPA: 3.91

American International University-Bangladesh, Dhaka, Bangladesh

M.Sc. in Computer Science, 2020 | CGPA: 3.85

North South University, Dhaka, Bangladesh

B.Sc. in Electronics and Telecommunication Engineering, 2016

Projects

Terraform Azure Secure Bastion Project — Cloud Infrastructure Project, 2026

- Provisioned secure Azure infrastructure with Terraform, including VNet, private subnet, Azure Bastion, NAT Gateway, route table, NSGs, and Log Analytics.
- Deployed a private Linux VM with no public IP and validated Bastion access, outbound routing, secure administration, and Azure Monitor logging.

Azure DevOps CI/CD and GitOps Deployment on AKS — Cloud Automation Project, 2026

- Built an Azure DevOps pipeline to containerize an application, push Docker images to ACR, and update Kubernetes manifests for automated AKS deployment.
- Used Argo CD GitOps, kubectl, Helm, and AKS monitoring tools to manage repeatable cloud application delivery.

Skills

Systems: Linux, Windows Server, Active Directory, DNS, DHCP, IIS, Group Policy

Virtualization: VMware ESXi, vSphere, Hyper-V, VM lifecycle management

Cloud/Identity: Microsoft Azure, AWS, Entra ID, Microsoft 365, Intune, Azure VNet, NSG, Bastion, AKS

Networking/Security: LAN/WAN, VLANs, VPN, Cisco, Mikrotik, Fortinet FortiGate, Cisco ASA, Meraki

Monitoring/Backup: Prometheus, Grafana, Azure Monitor, SolarWinds, Zabbix, Veeam, SAN/NAS, backup/restore

Automation/DevOps: PowerShell, Bash, Python, Terraform, Ansible, Git, Docker, Kubernetes, Argo CD

Certifications & Additional Information

Certifications: CCNA Routing & Switching, CCNA Security, Red Hat Certified Engineer (RHCE)

Work Authorization: F-1 OPT / STEM OPT eligible | **Location:** Cleveland, OH; open to relocation
